SUMMARY

I am an Artificial Intelligence student and I build systems with LLMs. I like to take a repetitive task, understand each step and turn it into an automated workflow, sometimes with several AI agents working together, each with its own role.

I code in Python and JavaScript, build integrations and workflows in n8n, and develop with the help of coding agents such as Claude Code and Codex. I am also interested in prompt engineering and web development.

In my personal projects I learn by building. Desafio de Kalos, for example, is a turn-based battle game in plain JavaScript, with automated tests and data from PokéAPI.

EXPERIENCE

Systems Analyst and Developer (LLMs), Ellicon Assessoria Contábil (September 2025 – present)

Development of systems and automations with LLMs, including a multi-agent system that automates production.

Finance, Ellicon Assessoria Contábil (September 2025 – present)

The company's financial routines.

PROJECTS

- **Desafio de Kalos**. A turn-based web battle game inspired by Pokémon XY, built with plain HTML, CSS and JavaScript and data from PokéAPI. (HTML, CSS, JavaScript, PokéAPI)
- **Multi-Agent Automation**. A system of several AI agents that automates production steps at an accounting firm. (Claude Code, Codex, n8n, LLMs)
- **UNISANTA Hackathon 2026**. Project Atlas, a platform for managing development team capacity from Azure DevOps data, built by a team of 4 for the iPORT challenge. (React, TypeScript, Vite, n8n, Supabase, Gemini)
- **Self-Checkout Kiosk**. An interface prototype for a self-checkout shopping kiosk, created in Figma for a college project. (Figma, UX/UI)

EDUCATION

- Associate Degree in Artificial Intelligence, [TODO: institution] (2026 – expected December 2027)
- Computer Engineering, [TODO: institution] (Attended in 2025)
- High School, Colégio Objetivo (Completed)

COURSES

- Python, FIAP – Nano Course
- Python, Santander Academy
- Artificial Intelligence Ethics, Bradesco Academy

SKILLS

Web: HTML, CSS, JavaScript

Back end: Python, C#, C++

Database: MySQL

AI & automation: LLMs, Multi-agent systems, Prompt engineering, n8n, Claude Code, Codex

Design: Figma
